Mission Statement

To serve the community by providing personalized, comprehensive cancer care that respects and values the needs of each individual.

Academic Cancer Care in a Community Setting®

Ironwood Cancer & Research Center (ICRC) physicians have a depth and diversity of backgrounds, bringing experience from major universities across the nation to Arizona. To make academic cancer care accessible to our community, ICRC offers disease-specific care with experts in the following sub-specialty divisions:

- Breast & Gynecologic Oncology
- Gastrointestinal Oncology
- Lung, Head & Neck Oncology
- Myeloma & Lymphoma
- Genitourinary Oncology
- Skin & Sarcoma Oncology

In addition, all of our physicians are able to consult for hematology and other less common cancers. Every patient is entitled to receive comprehensive services as part of their oncologic care, which include integrative oncology, registered dietitians, social workers, genetic counseling, and a wide range of cancer support groups. Our patients benefit from the convenience of on-site imaging, radiation, and clinical trial access.

Research Program

ICRC has an active and robust research program that gives patients access to therapies of the future. Our patients have participated in pivotal clinical trials that have changed the way oncology is practiced today. Our physicians are widely published and continue to advance their respective fields. Please see our website for a full list of recent publications.

Referral Information

Please reference this folder which includes all our physicians and their sub-specialties and contact information. All referrals will be a seamless process for you, your office, and your patients.

For information or to refer a patient please call

Medical Oncology & Hematology
